

EXAMS

Semester tests will be given during the last three days of each semester. All teachers are to give semester tests.

1. Figuring semester grades: (The semester test shall count as one-fourth of the semester grade.)
 1. Determine the average of the two nine-week grades and multiply that average by three (3).
 2. Add the semester test score.
 3. Divide the total by four.

Example: 1st nine weeks average: 90

2nd nine weeks average: 70

$90 + 70 = 160$ divided by 2 = 80 \times 3 = 240

Semester test score: 90 $240 + 90 = 330$ divided by 4 = 82.5

Semester grade is a B

Revision #6
