Installing Respondus Lockdown Browser for VA Students

If you are a Virtual Arkansas student and need to install the Respondus Lockdown Browser, follow the steps below.

1. Press the Windows key on your keyboard

2. Type in `chocolatey`

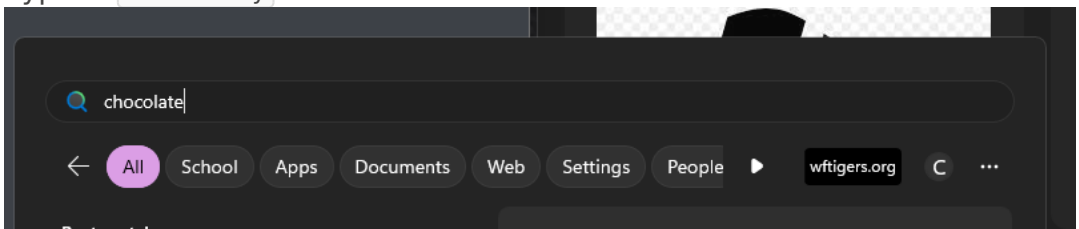

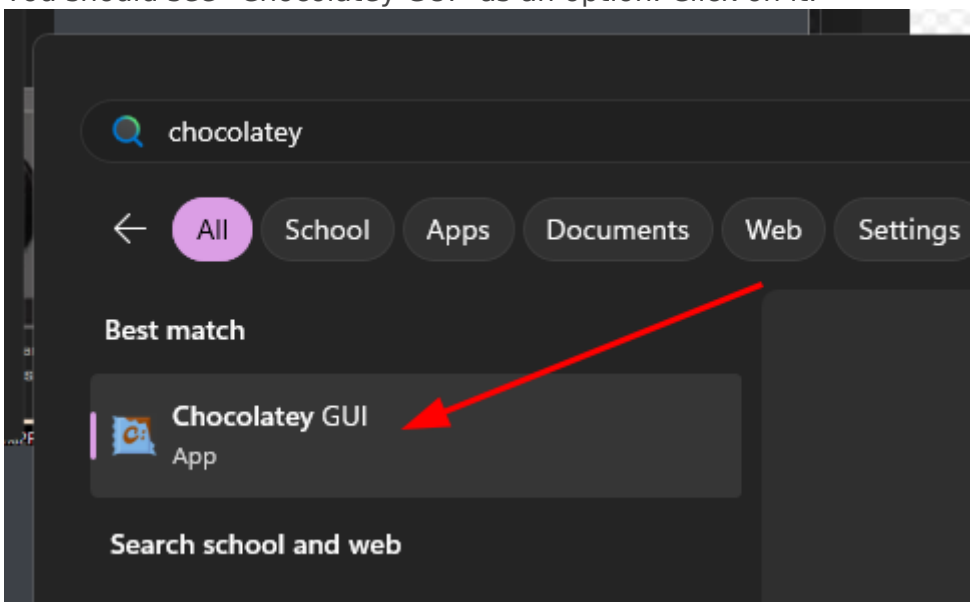

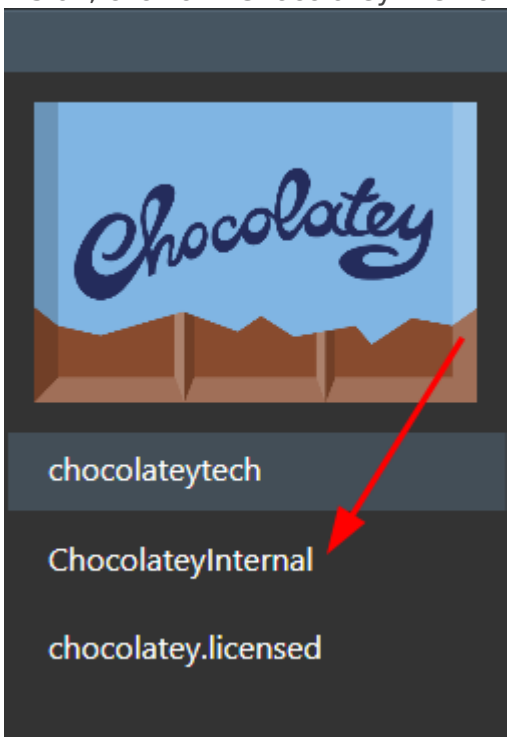

image805×751 52.8 KB

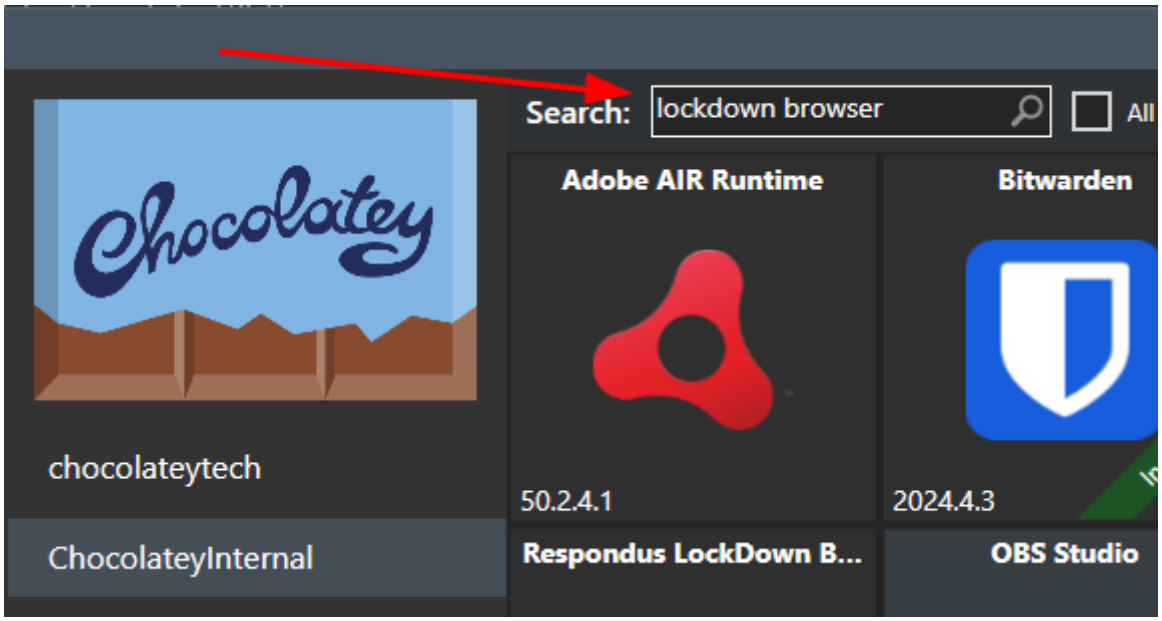

3. You should see “Chocolatey GUI” as an option. Click on it.

4. It takes a little time for this program to open. Be patient while it opens and looks for available applications.
5. Once loaded, you should see the Chocolatey app store. To look for a new program to install, click on “ChocolateyInternal” on the left.

6. In the search box, at the top, type in `lockdown browser`

7. This should bring up an icon that is named “Respondus LockDown Browser.” Right-click on it, and choose “Install.”

9. When it is finished, the box will close, and your lockdown browser icon will have an “installed” badge.

10. To open your lockdown browser, you should be able to double-click on the desktop icon.
